The U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) is the Army’s lead agency for research and development in the behavioral and social sciences. The basic research program is a critical link between the military and the scientific community and is focused on state-of-the-art advances in six research portfolios: Personnel Training and Performance; Learning in Formal and Informal Environments; Leader Development; Organizational Effectiveness; Culture and Individual Differences. ARI supports basic research, applied research, and advanced technology development aimed at improving Army readiness and performance. The program defines new issues requiring fundamental research, ensures that the basic research program is coordinated across military services, and facilitates the transition of basis research results to applied research programs for eventual use by the Army.

Dr. Jay Goodwin is Chief, Foundational Science Research Unit at the U. S. Army Research Institute for Behavioral and Social Sciences (ARI). He is responsible for the execution of a budget of approximately $10M for basic and applied research. He directs ARI’s basic research program, as well as research teams focused on emerging and developing concepts within the applied research program. Dr. Goodwin’s research expertise is in leadership, team and organizational effectiveness, and cultural factors in Joint, Interagency, and Multinational contexts. He was detailed to the Department of Defense Comprehensive Review Working Group as a research analyst and was the lead writer for the DOD report assessing the impact of the repeal of “Don’t Ask, Don’t Tell”, and he recently served as the lead behavioral science expert for a Department of Defense strategic planning effort for Defense Science and Technology. He was previously employed at the American Institutes for Research, where his project work included test development, employment litigation support with an emphasis on statistical analysis, training evaluation, and performance modeling. Dr. Goodwin received his M.S. and Ph.D. in Industrial/Organizational Psychology from the Pennsylvania State University. He is a Fellow of the Society for Industrial and Organizational Psychology as well as the American Psychological Association (APA).

Owens Institute for Behavioral Research
UNIVERSITY OF GEORGIA

PRESENTS
Dr. Jay Goodwin
U.S. Army Research Institute
Thursday, November 9, 2017

9:30-11:00am  Colloquia on ARI research priorities and interests.
               Miller Learning Center, #303 Reading Room

11:30-1:30pm  Conversation Hour with Tips on obtaining Army funding.
               Miller Learning Center, #303 Reading Room

Join us for one or both events!
